The BK Collection

Use division to solve each word problem. Make sure to show your work.

1. Ladybug Gia laid 12 eggs. She divided her eggs into 3 groups. How many eggs are in each group?

2. Divide 50 ladybugs into groups of 5. How many groups are there?

3. Four ladybugs found 84 insects to eat for the week. How many insects can each ladybug eat for there to be an even number?

4. Ladybug Jessica has 18 spots on her back divided into 3 rows. How many spots are in each row?

5. There are 90 leaves available for the first 5 ladybugs who get to ladybug land. How many leaves can each ladybug get?
